PREFACE

Extramural Research and Development (R&D) projects support by the Central Government agencies is aimed at promoting, catalyzing and advancing R&D and innovation in the country by providing special encouragement to research scientists.

The present report is fifth in the series of five-yearly reports brought out by the National Science & Technology Management Information System (NSTMIS) Division of the Department of Science & Technology (DST). It provides an analysis of 20,497 projects approved for funding by 23 Central Government Departments/ Agencies spread across 2,634 performing S&T institutions and 117 individual entrepreneurs aggregating to a value of Rs. 6331.76 crores during the period 2005-2010. The report also contains a state-wise list of institutions funded during the period, institute-wise number of projects and approved cost and addresses and website addresses of funding agencies.

NSTMIS is inter-alia responsible for collecting, compiling, analyzing and disseminating information on Extramural (sponsored) Research and Development (R&D) projects funded by various agencies in the country. As a part of this effort the NSTMIS maintains an extended database of extramural R&D Projects approved by the central S&T departments/agencies.

The database contains information on projects approved by these agencies from 1990-91 onwards. Based on this database, annual directories of the projects approved for funding by various agencies are being brought out every year. The NSTMIS also supports research projects on key science policy issues including S&T human resource development.

It is hoped that this report on sponsored research, as the earlier reports, would be useful for scientists, funding agencies, planners and policy makers. The NSTMIS welcomes comments/ suggestions on the report.

The DST is grateful to all the central government departments/ agencies including members of the Programme Advisory Committee for their significant contribution in making this report highly resourceful.

Introduction

In India, the Central Government is the main agency of scientific and industrial research contributing about 71% of the total investment towards national Research and Development (R&D) activities.

All the major scientific agencies of Central Government support R&D work in the form of extramural or sponsored EMR Projects to individual scientists / institutions to carry out specific time-bound research projects in the areas of their interest. The purpose of this extramural R&D funding is to build substantial research capability and infrastructure in the country.

In the central sector, scientific research is carried out mainly under number of government departments and autonomous agencies, which are specifically engaged with various R&D activities.

In the category of R&D organizations, there are two types of departments/ agencies:

- I. **R&D performing bodies** such as Department of Atomic Energy (DAE), Department of Space (DOS), Council of Scientific and Industrial Research (CSIR), Indian Council of Agricultural Research (ICAR) among others.
- II. **R&D sponsoring bodies** such as the Department of Science and Technology (DST), Department of Biotechnology (DBT), Ministry of Earth Sciences (MOES, formerly Department of Ocean Development) among others.

R&D performing bodies also support extramural research; but it is the R&D sponsoring bodies, which play major role in the promotion of scientific research through time-bound EMR Projects.

With the co-operation of all the R&D funding departments/ agencies, the National Science Technology Management Information System (NSTMIS) Division of the Department of Science and Technology (DST) has been compiling information annually on extramural EMR Projects approved by major central funding agencies. This information is maintained as a computerized database from 1990-91 onwards.

Starting from 1990-91 onwards, NSTMIS has been annually publishing a directory of extramural EMR Projects approved by the central S&T agencies during the year. So far, 21 directories giving details of the approved EMR Projects have been brought out.

Based on this information, NSTMIS has already published four reports on the funding pattern of sponsored research by scientific agencies for the various periods viz 1985-90, 1990-95, 1995-2000 and 2000-2005.

In continuation of the above efforts of NSTMIS, the present report, fifth in the series, provides an analysis of the funding pattern of sponsored research during the period (2005-2010). The analysis is based on the inputs received from various central government departments/agencies.

Scope & Coverage

Subject Areas

EMR Projects are classified into the following eight major subject areas:-

- ❖ Agricultural Sciences
- ❖ Biological Sciences
- ❖ Chemical Sciences
- ❖ Earth Sciences
- ❖ Engineering and Technology
- ❖ Mathematics
- ❖ Medical Sciences
- ❖ Physical Sciences

This Classification is based on the subject areas indicated by the agencies and also on the title of the projects. Some of the funded projects are multi-disciplinary in nature but have been classified in one of the above areas depending on their major thematic emphasis.

Classification by Type of Institutions

Various institutions who received funding during the period 2005-2010 have been classified into 11 categories as given below.

Note: - It may be noted that in contrast with earlier reports of 1990-95 and 1995-2000, in this report like 2000-2005, the classification has been extended by including six separate categories viz science colleges, engineering colleges, medical/pharmacy colleges/hospitals, state government departments/state S&T councils, corporate sector (public and private) companies and their research organisations and voluntary organisations.

In the period under review (2005-2010), data analyzed also includes details of 117 nos. of individual entrepreneurs funded by DSIR during the period 2008-2009 (65 Nos.—Rs. Crores 4.47) and 2009-2010 (52 Nos. --Rs. Crores 3.37).

Executive Summary

National Science & Technology Management Information Systems (NSTMIS), Department of Science & Technology, Govt. of India, is inter-alia responsible for collecting, compiling, analyzing and disseminating information on Extramural (Sponsored) Research & Development (R&D) projects funded by various agencies in the country. As a part of this effort, NSTMIS maintains an extended data base of Extramural (EMR) Projects approved by the central S&T departments / agencies. The data base contains information on projects approved by these agencies from 1990-1991 onwards. Based on this data base, annual directories of the projects approved for funding by various agencies are being brought out every year. In addition, five year analyses are also undertaken by NSTMIS.

Analysis of the five year data has been carried out in the following broad areas:-

- Funding by Scientific Agencies
- Funding by Subject Areas
- Funding by Types of Institutions
- Region wise Distribution of Projects

The present analysis of five years is for the period 2005-2010. Following is the executive summary of the analysis:-

1. OVERVIEW

A total of 20497 EMR Projects costing Rs. 6331.76 crores, covering a total of 2751 institutions (2634 institutions + 117 individual entrepreneurs), were approved by 23 central government departments/agencies during the period 2005-2010. During this period, the number of projects sponsored in a year varied from 4828 in 2009-2010 to 3569 in 2005-2006. The total approved cost varied per year from Rs.1358.04 crores to Rs.1163.80 crores. This shows an increasing trend in both the number of projects and approved cost (Table 1.2 & Table 1.3 & Fig. 1.1A & Fig 1.2).

On an overall basis, for all the funding agencies taken together, the quantum of funding in Rs. Crores increased by 201% in the period 2005-2010 as compared with 2000-2005 (Table 1.4 & Fig. 1.4)

R&D support reached out to 16731 scientists as principal investigators (PIs) spread over a total of 2634 institutions plus 117 individual entrepreneurs (Total 2751) located in 32 states in 637 cities / towns in the country (Table 1.9, Table 4.1 & Table 4.5).

Various institutions funded were from 288 universities, 890 science colleges, 360 engineering / technology and management colleges, 255 medical and pharmacy colleges/hospitals, 65 deemed universities, 40 institutes of national importance, 266 national laboratories, 67 state government departments/state S&T councils, 20 Scientific and Industrial Research Organizations (SIRO), 106 corporate sector companies/research institutions and 277 voluntary organizations (Table 3.1)

The average cost of EMR project during 2005-2010 was Rs. 30.89 lakhs, while during the period 2000-2005 it was Rs 17.55 lakhs. Thus, the average cost of a project in 2005-2010 increased by about 76% as compared with 2000-2005 (Table 2.3).

2. FUNDING BY SCIENTIFIC AGENCIES

(a) Number of Projects (Table 1.2)

Maximum number of projects 6676 (32.6%) were approved by Department of Science & Technology (DST), followed by 4781 (23.3%) University Grants Commission (UGC), 2349 (11.5%) Department of Bio-Technology (DBT), 1527 (7.5%) Indian Council of Medical Research (ICMR) and 1380 (6.7%) Council of Scientific and Industrial Research (CSIR). These Five agencies accounted for about 81.5% of the total sponsored projects during the period 2005-2010.

On an average, every year 1335 new projects were approved by DST, 956 by UGC, 470 by DBT, 305 by ICMR and 276 projects by CSIR. On overall basis per year 4100 new projects were approved and value wise Rs. Crores 1266.

(b) R&D Funding (Table 1.2)

(g) Average Number of Projects per Institution (Table 3.1)

As compared to other groups of institutions, the institutes of national importance had the highest average number of projects per institution (72) during the five-year period (2005-2010) under review, followed by 24 for universities, 17 for deemed universities, 12 national laboratories, engineering, management, medical hospitals and SIROs 4 each, science colleges, state government organizations and voluntary sector 3 each and 1 each for corporate sector & individual entrepreneurs. Considering all the institutions together, on an average, 7 projects were approved to an institution during the five-year period 2005-2010, same as during 2000-2005.

(h) Average Funding per Institution (Table 3.1)

Like average project per institution, the average funding per institution for the five-year period under study was the highest in the case of institutes of national importance - Rs. Crores 29.30, which means each of these institutions, on an average, obtained a research grant of Rs. Crores 5.86 in a year, witnessing a marginal decrease of 14.95% over 2000-2005. For other sectors, the average funding per institution varied from 1 crore to 6 crore and lowest in case of individual entrepreneurs (0.07 crore). On an

overall basis, taking all the sectors together, this value works to 2.30 crores. As against Rs. 1.24 Crores during 2000-2005 (85% increased)

(i) Change in Institutional Outreach from 2000-2005 to 2005-2010 (Table 3.2 & Fig. 3.3)

As compared to 2000-2005, the period 2005-2010 witnessed an increase of about 55% in the number of institutions receiving R&D support from 1773 to 2751. Maximum increase (344%) was for Institutes of National Importance, followed by (102%) in Others, (Constitute corporate sector, individual entrepreneurs, SIROs, state government departments / S&T councils, voluntary sector and hospitals). Only, National Laboratories witnessed decrease of 13%. The increase in case of universities was 85%, colleges (science, engineering and medical) 66% and deemed universities 44%

(j) R&D Support to Top Ten INIs (Table 3.3 & Fig. 3.4)

During 2005-2010, out of total R&D funding to INIs, maximum Rs. Crores 189.45 (16%) was received by IIT - Bombay, followed by Rs. Crores 181.27 (15%) IIT – Madras. (Table 3.3 & Fig.3.4). The total funding for all the 40 INIs was Rs. Crores. 1172.04 as per details in **Annexure III**

(k) Agency-wise Distribution of Projects among Institutions (Tables 3.4, 3.4.1 & Fig. 3.5, 3.5.1)

For the academic sector, UGC (4767), DST (4752), DBT (1360), CSIR (1157), ICMR (1047) and AICTE (970) were the main agencies funding the various projects, accounting for 87% of the total number of approved projects for this sector. With in this sector, universities got maximum funding for 7030 projects – UGC (2384), DST (2203), DBT (681), CSIR (579) and others (1183), followed by 2877 Institutes of National Importance—DST (1277), DBT (273), CSIR (345), ICMR (343) and others (639), accounting for together more than 70% of the total projects sponsored for the academic sector during 2005-2010 as compared with 9433 in 2000-2005.

Other than academic sector, National Laboratories got maximum 3074 projects – DST (1426), DBT (694), ICMR (346), CSIR (187) and others (421), accounting for 70% of projects awarded. Voluntary sector was awarded 750 projects – DST (315), DBT (213), ICMR (83), CSIR (26) and others (113), accounting for 17% of projects awarded.

(l) Top 10 Institutions (Table 3.5)

Top 10 institutions were awarded 3355 (16%) projects amounting to Rs. crores 1544.94 (24%). Maximum 468 (2%) projects totaling to a value of Rs. crores 355.96 (6%) were approved for Indian Institute of Science, Bangalore, followed by Indian Institute of Technology (Kh), 376 (2%) projects totaling to a value of Rs. crores 155.46 (2%). IISc Bangalore and the five IITs together accounted for 19% of total R&D funding.

(m) Dispersal of Projects among Institutions (Table 3.6)

The extent to which the agencies disperse projects among the institutions can be assessed by using the indicator called project dispersal ratio. This ratio for a particular funding agency is therefore defined as the ratio of the number of institutions accounting

for 50% of the projects to the total number of institutions getting support from that agency.

Considering all the funding agencies together, for the period under review, 2005-2010, total number of unique institutions comes to 2751 and number of unique institutions accounting for 50% of projects comes to 1153. Therefore, the overall project dispersal ratio is $1153/2751=0.42$. This means that 42% of the institutions accounted for 50% of the projects approved against 4% for the period 2000-2005. The project dispersal ratio for the period 2005-2010 has shown great improvement as compared with 2000-2005. This ratio is lowest in case of Ministry of Earth Sciences (0.14) and highest in case of Ministry of Steel (1) but we can ignore this since they funded only one project and the next highest is Ministry of Social Justice and Empowerment (0.75).

(n) Dispersal of Funding among Institutions (Ref, Table 3.6)

Similarly, the dispersal of R&D funding among the institutions can be assessed by using the indicator called funding dispersal ratio. This ratio for a particular agency is therefore defined as the ratio of the number of institutions accounting for 50% of the funding to the total number of institutions getting support from that agency.

As regards dispersal of funding, the overall ratio comes to 0.41 this means that 41% of the institutions accounted for 50% of the funding against 3% for the period 2000-2005. The project dispersal ratio for funding for the period 2005-2010 has shown great improvement as compared with 2000-2005. This ratio is lowest in case of Ministry of Earth Sciences (0.07) and highest in case of Ministry of Steel (1) but we can ignore this since they funded only one project and the next highest is Ministry of Social Justice (0.75) and Empowerment and Ministry of Environment and Forests (0.75).

5. REGION-WISE DISTRIBUTION OF PROJECTS

(a) City-wise Distribution (Table 4.1 & 4.2)

During the period 2005-2010, the R&D funding was dispersed among the institutions located in 637 cities / towns against 408 in 2000-2005 in the country. Among these locations, the institutions based in eight metropolitan cities received 56% of the total funding, those in 25 state capitals/UTs 11% and the rest in other 604 cities and towns 31% of the total funding support.

Among total of 637 locations in the country, 82 cities had 50 or more projects. These accounted for 16798 (82%) projects and Rs. Crore 5718.83 (90%) of total R&D funding during the period under review. Among these cities, maximum 30 (37%) cities were located in northern region, followed by 20 (24%) in southern region.

Maximum funding Rs. Crores 874.54 (14%) of total funding during (2005-2010) was received by the institutions located in Delhi, followed by Rs. Crores 602.10 (10%) by the institutions located in Bangalore. Similarly maximum 2286 (11%) of total number of projects approved during (2005-2010) were from Delhi, followed by 1172 (6%) from Bangalore

(b) Comparison with the period 2000-2005 (Table 4.3 & Fig 4.1)

The dispersal of R&D funding for cities having 50 or more projects increased by 31 (61%) in 2005-2010 as compared with 2000-2005, number of projects by 7214 (75%) and the approved funding by Rs. crores 3866 (209%)

(c) State-wise Distribution (Table 4.4, 4.5 & Fig. 4.2)

Maximum funding (14%) was received by institutes in Delhi, followed by (13%) in Maharashtra and least in (0.10%) in Mizoram.

About 70% of the projects were approved for the institutions located in seven states viz. Andhra Pradesh, Delhi, Karnataka, Maharashtra, Tamil Nadu, Uttar Pradesh and West Bengal. The share of these states witnessed a marginal decrease of 0.67% in number of projects as compared with the period 2000-2005. These seven states contributed 76% of the total funds approved and as compared with 2000-2005, 2% increase.

Five states namely, Andaman & Nicobar, Arunachal Pradesh, Mizoram, Nagaland and Sikkim, each had less than 50 projects and in total contributed only 177 (0.86%) projects for a total funding of Rs. crores 42.29 (0.67%)

(d) Project Funding for North-Eastern Region (Table 4.4)

During 2005-2010, the north-eastern region consisting of eight states (Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura) accounted for only 7% of the projects and 3% of the total funding of Rs. crores 6331.76. This period witnessed a slight increase in the percentage number of projects allocated to this region over that in 2000-2005 (3%) and funding wise (0.7%).

(e) State Funding Dispersal Ratio (Table 4.5)

The extent to which the project funding was dispersed among the states/UTs can be assessed by using the indicator, state funding dispersal ratio. This ratio is defined as ratio of the number of states/UTs accounting for more than 50% of the projects to the total number of states/UTs in the country.

Five states – Andhra Pradesh, Delhi, Karnataka, Maharashtra and Tamil Nadu accounted 60% of the total funding of Rs. crores 6331.76. Since the total number of states/UTs is 32, the state funding dispersal ratio is $5/32 = 0.16$. This means the dispersal of project funding among the states during the period 2005-2010 was extremely low and it is same as during the period 2000-2005.

(f) State-wise Number of Universities receiving R&D Support (Table 4.6 & Fig. 4.3, 4.4 & 4.4.1)

Maximum 73 (25%) universities funded were situated in the state of Maharashtra, followed by 26 (9%) in Tamil Nadu. However maximum number of projects 1030 (15%) were approved from the state of Tamil Nadu, followed by 841 (12%) from Uttar Pradesh. Money wise maximum Rs. crores 224.75 (17%) were approved for the state of Delhi, followed by Rs. crores 205.96 (15%) for Tamil Nadu.

(g) State wise List of Institutions and Projects Funded During 2005-2010

Many departments / agencies of Government of India fund various EMR Projects in the country annually. This chapter deals with analysis of R&D funding for the period 2005-2010 on the following parameters:-

- Number of projects with total approved cost sanctioned during the period 2005 - 2010 by various councils / commissions, departments, ministries and other specialist agencies of the central government and comparison with previous periods 2000-2005, 1995-2000 and 1990-1995.
- %age increase / decrease in funding support by central S&T departments / agencies in 2005-2010 over 2000-2005
- Cost pattern of projects from Rs. Lakhs < 1 to > Rs. Lakhs 100 in various range

During the period under review (2005-2010), maximum number of projects 6676 (32.6%) were approved by Department of Science & Technology (DST), followed by 4781 (23.3%) University Grants Commission (UGC), 2349 (11.5%) Department of Bio-Technology (DBT), 1527 (7.5%) Indian Council of Medical Research (ICMR) and 1380 (6.7%), Council of Scientific and Industrial Research (CSIR). These Five agencies accounted for about 82% of the total sponsored projects during the period 2005-2010. As compared with the period 1990-1995, during the period 2005-2010, quantum of funding in terms of number of projects approved has gone-up 3 times (6791 to 20380) and 12 times (Rs. Crores 547.74 to Rs. Crores 6323.97) (Table 1.1 & 1.2 & Fig. 1.1A , 1.1B & 1.2).

1.8 Outreach of R&D Support to PIs and Gender Representation

A total of 16731 principal investigators (PI's) were involved in sponsored R&D. Among the funding agencies, the outreach to the scientists was the highest in the case of DST 5379 (32%), followed by UGC 4159 (25%). The gender representation of females among the PI's during the period under review (2005-10) was 23%, as compared to 16% during 2000-05.

Therefore, the participation of female PI's in the period 2005-10 has increased by 1.44 times. (Table 1.9).

Chapter 2

Funding by Subject Areas

Many departments / agencies of Government of India fund EMR Projects in various subject areas viz agriculture sciences, biological sciences, chemical sciences, earth sciences, engineering & technology, mathematics, medical sciences and physical sciences. This chapter therefore deals with analysis of R&D funding subject area wise for the period 2005-2010 on the following parameters:-

- Subject area wise extramural R&D support since 1990
- Subject area wise change in %age share in extramural R&D support in 2005-2010 over 2000-2005
- Subject area wise average project cost
- Subject area wise range of approved cost from Rs. Lakhs < 1 to > Rs. Lakhs 100
- Funding agency wise two most preferred subject areas by %age of total projects during the period 2005-2010

2.1 Subject Area wise Number of Projects and R&D Funding

Maximum 4994 (24.4%) projects were approved in the subject area of biological sciences, followed by 4051 (19.8%) in engineering and technology. These two subject areas together contributed for 9045 (44.2%) projects out of total of 20497 projects. In case of Biological Sciences, Mathematics and Medical Sciences, the %age of projects in 2005-2010 showed marginal increase varying from 0.7% to 7%. However, in case of other subject area, there was decrease in %age of projects in 2005-2010 over 2000-2005 varying from 0.4% to 4.8%.

Maximum approved cost of Rs. Crores 1937.71 (30.6%) was in the subject area of engineering & technology, followed by medical sciences Rs. Crores 1492.06 (23.6%). These two subject areas together contributed for Rs. Crores 3429.77 (54.2%) out of total approved cost of Rs. Crores 6331.76

As regards number of projects, in 2005-10, as compared with 2000-05, number of projects in engineering & technology registered a growth from 2776 to 4051 (46%) and 2158 to 4994 (131%) in biological sciences. Similarly, cost wise engineering & technology registered a growth from Rs. crores 641.51 to 1937.71 (202%) and from Rs. crores 276.98 to 1249.94 (351%) in biological sciences.

The extramural R&D support like 2000-05, was least both number wise and cost wise in the subject area of mathematics. (Table 2.1 & Fig. 2.1 & 2.1.1)

Crores 355.96 (5.6%) were approved for Indian Institute of Science, Bangalore, followed by Indian Institute of Technology (Kharghpur), 376 (1.8%) projects totaling to a value of 155.46 crores (2.5%). IISc Bangalore and the five IITs together accounted for 18.9% of total R&D funding. (Table 3.5)

3.8 Agency wise Dispersal of Projects and Funding among Institutions

The extent to which the agencies disperse projects among the institutions can be assessed by using the indicator called project dispersal ratio. This ratio for a particular funding agency is therefore defined as the ratio of the number of institutions accounting for 50% of the projects to the total number of institutions getting support from that agency. Similarly, the dispersal of R&D funding among the institutions can be assessed by using the indicator called funding dispersal ratio. This ratio for a particular agency is therefore defined as the

ratio of the number of institutions accounting for 50% of the funding to the total number of institutions getting support from that agency.

Considering all the funding agencies together, for the period under review, 2005-2010, total number of unique institutions comes to 2751 and number of unique institutions accounting for 50% of projects comes to 1153. Therefore, the overall project dispersal ratio is $1153/2751=0.42$. This means that 42% of the institutions accounted for 50% of the projects approved against 4% for the period 2000-2005. The project dispersal ratio for the period 2005-2010 has shown great improvement as compared with 2000-2005. This ratio is lowest in case of Ministry of Earth Sciences (0.14) and highest in case of Ministry of Steel (1) but we can ignore this since they funded only one project and the next highest is Ministry of Social Justice and Empowerment (0.75).

As regards dispersal of funding, the overall ratio comes to 0.41 (1137/2751) this means that 41% of the institutions accounted for 50% of the funding against 3% for the period 2000-2005. The project dispersal ratio for funding for the period 2005-2010 has shown great improvement as compared with 2000-2005. This ratio is lowest in case of Ministry of Earth Sciences (0.07) and highest in case of Ministry of Steel (1) but we can ignore this since they funded only one project and the next highest is Ministry of Social Justice (0.75) and Empowerment and Ministry of Environment and Forests (0.75). Chapter 4

Region wise Distribution of Sponsored Projects

This chapter deals with analysis of EMR funding distribution region wise for the period 2005-2010 on the following parameters:-

- Distribution of EMR funding by type of cities during 2005-2010
- Distribution of EMR Projects by cities having 50 or more projects during 2005-2010
- City wise Distribution of EMR Projects having 50 or More Projects during 2005-2010 & 2000-2005
- Comparison with the earlier period 2000-2005 w.r.t. number of cities, number of projects approved along with value
- Distribution of number of EMR Projects and funding by states/UTs during 2005-2010, 2000-2005, 1995-2000 and 1990-1995
- Ranking of state/UTs by R&D funding during 2005-2010
- State wise number of universities receiving R&D support

4.1 City-wise Distribution

During the period under review, 2005-2010, the R&D funding was dispersed among the various institutions spread in 637 cities in the country. Among this location, institutions located in 8 Metropolitan Cities received maximum 55.7% of the total funding, followed by 31.4% in other Cities/Towns (Table 4.1)

4.3 Distribution of Number of EMR Projects and Funding by States/UTs during 2005-2010, 2000-2005, 1995-2000 and 1990-1995

About 70% of the projects were approved for the institutions located in seven states viz. Andhra Pradesh, Delhi, Karnataka, Maharashtra, Tamil Nadu, Uttar Pradesh and West Bengal. The share of these states witnessed a marginal decrease of 0.7% in number of projects as compared with the period 2000-2005. These seven states contributed 76% of the total funds approved and as compared with 2000-2005, (2.2% increase)

During 2005-2010, the north-eastern region consisting of eight states (Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura) accounted for only 6.6% of the projects and 3.3% of the total funding of Rs. crores 6331.76. This period witnessed a slight increase in the percentage of projects allocated to this region over that in 2000-2005 (3.7%) and value wise (0.7%). (Table 4.3)

4.4 Ranking of State/UTs by R&D Funding during 2005-2010

Maximum funding (13.8%) was received by institutes in Delhi, followed by (13.1%) in Maharashtra and least in (0.1%) in Mizoram.

Value wise, about 76% of the projects who received R&D funding were located in 7 states viz Andhra Pradesh, Delhi, Maharashtra, Karnataka Tamil Nadu, Uttar Pradesh and West Bengal. As compared with 74% in 2000-2005. As regards number of projects, in 2005-2010, 69.4% projects were funded from these 7 states as compared with 70% in 2000-2005 i.e. more or less same.

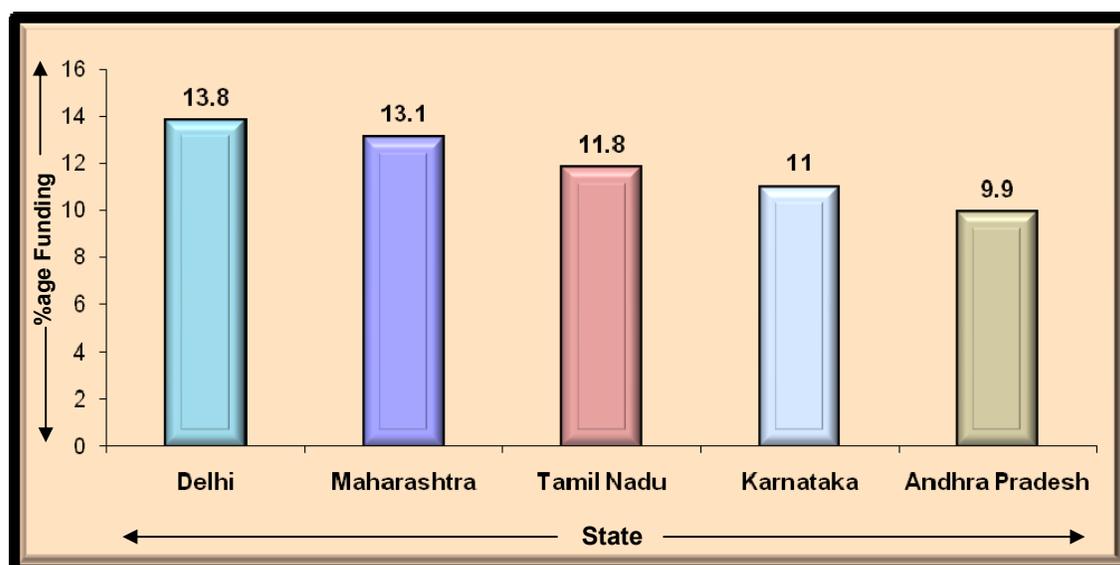

Five states – Andhra Pradesh, Delhi, Karnataka, Maharashtra and Tamil Nadu accounted 59.6% of the total funding of Rs. crores 6331.76. Since the total number of states/UTs is 32, the state funding dispersal ratio is $5/32 = 0.16$. This means the dispersal of project funding among the states during the period 2005-2010 was extremely low and it is same as during the period 2000-2005. (Table 4.4 & Fig.4.2)
